

Specialised lab solutions, tailored to you

Unilabs Pharma Solutions

Why choose us?

End-to-end support:

- Integration of tailored project management, logistics, sample materials and data reporting.

Global reach:

- Operations in 70+ countries, compliant with international standards.

Customization & agility:

- Tailored solutions and efficient turnarounds to meet evolving study needs.

Quality & compliance:

- IATA-compliant shipping, FDA/GCP adherence and rigorously documented procedures.
- One of our laboratories is ISO 15189:2022 accredited and registered as a Health Institution under Article 5 (5)(c).

Project Management

Our team is dedicated to clear and responsive communication to support all project needs. A **single point of contact** ensures smooth day-to-day operations and timely issue resolution.

We take a proactive and transparent approach, with clear accountability at every stage. Project plans are tailored to study milestones, and we can provide study-specific documents, including laboratory manuals and investigator guides.

Sample Collection Material

We provide high-quality, customised sample materials designed to meet your protocol requirements.

Our **in-house production** allows us to manage design and quality standards at every step and keep sample stock for immediate dispatch – re-orders and replacements can typically be available within 10 working days.

We also offer flexible sample-material compositions to suit the needs of individual sites or cohorts.

Global Logistics

Our global logistics network supports **worldwide delivery and collection**, whether to clinical sites, doctors' surgeries or third-party distributors.

Our courier partnerships allow us to offer cost-effective shipping solutions.

All consignments include daily location monitoring, and additional temperature monitoring can be added if necessary.

Tailored Data Reporting

We offer flexible data-reporting solutions.

Our in-house IT and web-support teams develop secure portals, bespoke dashboards and API integrations for **real-time access to results**.

Our dedicated Data Management team delivers customised, compliant solutions to support your project.

Throughout, we work closely with your team to refine reports and adapt to evolving needs.
